Magma Firestop® for Thatch

Protect your thatch from the major cause of fire; ejected embers and chimney fires, as thatch fires are notoriously difficult to put out.

Products:

- SG-2H External thatch protection
- IMW 436 Internal thatch protection

What it does:

Protects against sparks and embers - the main proven cause of thatch fires*

- Suitable for new or existing thatch
- Dries (and cures) within a few hours

What it gives:

- Cost effective fire prevention
- Peace of mind
- Guaranteed protection for 3 years
- Potential for insurance premium reductions

*See Burgoyne's Forensic Investigator's Thatch Fire Survey

Application:

- External and/or internal spray coating
- By trained & certified sprayers

Our certified sprayers use a unique specialist technique and equipment to give a professional application to your roof.

Quality products:

- Top rating; 'A' under BS476 part III for reducing the spread of flame
- Tested and proven worldwide
- Environmentally safe
- Manufactured by a well-established (over 20 years) international company which specializes in fire retardant products
- Manufacture process is ISO certified
- No detrimental effect on the thatched roof
- No toxic elements
- Safe to handle

Reapplication:

- Usually required after 5 years
- Or any major renovations to the thatch

Peace of Mind

"Probably the best fire retardant spray in the World"

About Us

SMF Crouch & Co, primarily Master Thatchers, have been the UK Magma Firestop® distributor for over 15 years.

We provide training and certification for a select number of sprayers, in collaboration with the Netherlands based manufacturer.

Your sprayer requires:

- 🔥 A dry roof on a dry day
- 🔥 Preferably a newly maintained (or newly replaced) thatch roof
- 🔥 Access to electricity and water if possible

Your sprayer will provide:

- 🔥 Specialist spraying equipment
- 🔥 A Treatment Certificate after application and payment

NB: Scaffolding is unlikely to be required

Proven Technology

In the UK, Magma Firestop® has been tested to BS476-3 achieving BA rating.

Independently tested by a number of bodies worldwide, confirming their effectiveness in reducing the fire hazard.

Magma Firestop® for Wood

- 🔥 TG-3 Wood protection
- 🔥 Can be applied by spray or impregnation method to achieve fire protection
- 🔥 Contact us for details on appropriate wood types for treatment
